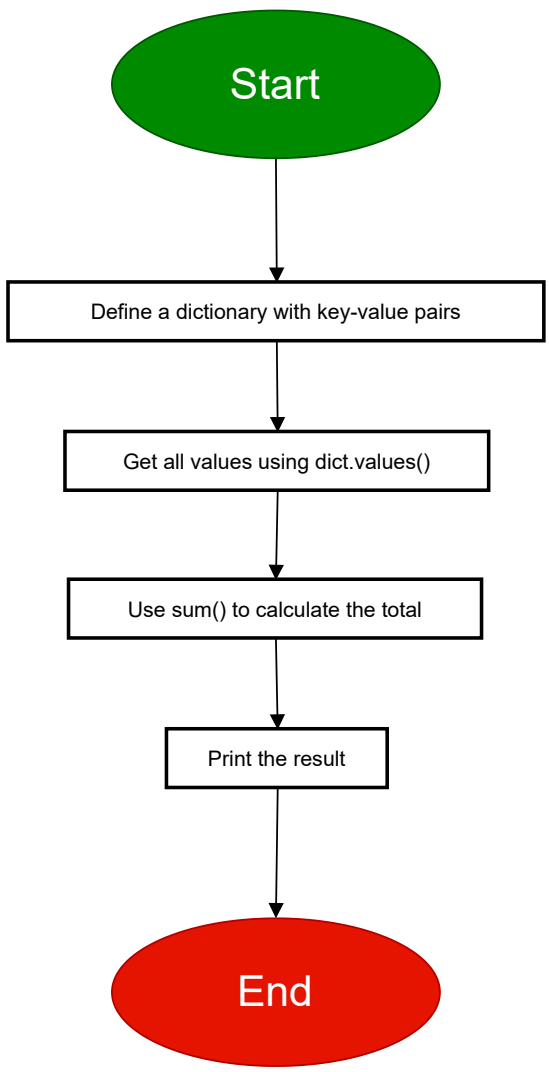
17. Write a Python program to sum all the items in a dictionary.



```python
# c.  Write a Python program to sum all the items in a dictionary.

# Sample dictionary
my_dict = {'a': 100, 'b': 200, 'c': 300}

# Sum all the values
total = sum(my_dict.values())

# Print result
print("Sum of all values:", total)
```
