

7. Define a function that computes or calculate the length of a given list or string.

```
# b. Define a function that computes or calculate the length
```

```
def compute_len(data):  
    print(len(data))
```

```
# data = input("Enter the data which you want to calcute: ")  
data = ['2','sdf',32,[1,2,3,]]  
compute_len(data)
```
